

## THE FINAL BARRIER AGAINST ABRASION, CHEMICALS AND HEAT

### ARMATEX® FIRESTAR 30

ARMATEX® FIRESTAR 30 is a fiberglass fabric treated with a proprietary refractory compound that greatly enhances the resistance to burn through, flame impingement, abrasion, sparks and molten splash and corrosion. It also greatly improves the thermal properties of the fabric.

ARMATEX® FIRESTAR 30 is designed for use in welding protection and drop cloths, removable thermal insulation jackets, stress relieving blankets and thermal barriers.

#### AVERAGE PHYSICAL PROPERTIES

Coating	Vermiculite-based refractory compound
---------	---------------------------------------

Color	Gold
-------	------

Width, inches	60
---------------	----

Thickness, inches, nominal	.049 (+/- 10%)
----------------------------	----------------

Weight, oz/sq yd, nominal	30 (+/- 10%)
---------------------------	--------------

Temperature Rating	
--------------------	--

Base Fabric	1000° F • 538° C
-------------	------------------

Coated Fabric	1500° F • 815° C, 30 mins 1 side
---------------	----------------------------------

	2000° F • 1093° C, transient exposure
--	---------------------------------------

Standard Roll Size	25 LY x 82 lbs.
--------------------	-----------------
