

ENVIRONMENTAL PROTECTION PRODUCTS AND THERMAL BARRIERS For a Green World

ARMATEX® SILICONE COATED SILICA FABRICS

ARMATEX® SS Coated Fabrics are comprised of silica fabric coated one or both sides with silicone rubber, and are ideal products for heavy-duty protection of personnel in applications with molten metal splash or weld sparks and splatter. ARMATEX® SS Coated Fabrics have a higher temperature capability and higher strength base fabric than traditional welding fabric, and the coated material has excellent abrasion resistance.
